

ALEJANDRA TORRES

Virtuosity, elegance and - when she sings: pure passion !
How can somebody combine Classical music, Jazz and World Music in such a way that one could think this new kind of style was just invented for her?

Her music is no "crossover" by any means, no mixture.
It's a pure, compact form of energy - positive like an ancient secret medicine from South America!

JUAN CARLOS PANIAGUA

As a composer and arranger he loves to mix musical forms and styles - like a painter mixing colours.
He shows us how to combine a piano and an accordion in a multilayered way which does not compromise the musical intention.

JUAN GARCÍA-HERREROS

Rarely do you find an Electric Contrabassist showing so many different sounds to please your ears. The fact that his instrument defines the rhythm and groove is only one of many attributes.

The other is his ability to make spherical and elegant ambience resonate with every string in a new and exiting evolution of the instrument . A perfect combination !
